**Title of Artwork:** The Star of Heavenly Ascension  

**Description of Artwork:**  

1. By the Star when it goes down,  

7. While he was in the highest part of the horizon:  

8. Then he approached and came closer.  

9. And was at a distance of but two bow-lengths or (even) nearer;  

13. For indeed he saw him at a second decent,  

14. Near the Lote Tree beyond which none may pass:  

15. Near it is the Garden of Abode.  

16. Behold, the Lote Tree Was shrouded (In mystery unspeakable!)  

Holy Qur’an; Sūra 53: Najm, The Star ✪  

These verses give a glimpse into the ever-expansive quality of Prophet Muhammad’s (sws) journey up to the highest 7th heaven, where The Lote Tree resides encapsulated by light, closer than close can be to Divine Presence. It is reality, — inner reality of heaven, as far as knowledge can reach. Where no man has ever gone before, but The Heart contains it.  

It is said that Angel Gabriel appeared descending above the mountain of light (the ascended peak), magnificently expansive in every way, to assist Prophet unto & into this heavenly ascension. As also represented by the green dome in this piece. To display a double meaning of
spiritual significance of him making a stop in Medina after being picked up from Mecca, where he eventually was led up on a mystical staircase from Jerusalem.

The mystical winged angelic being can also be a representation of The Buraq, that transversed him into the levels of heavens, through the openings in the universe — at light speed — folding time and space to get close proximity to Divine Presence. What he witnessed there was beyond imaginable, that no one can describe — Moving up into the dimensions of the heavenly mirage (ascension).

The Sun shaped Star is also representing Sirius (The Mighty Star) which is mentioned in the Qur’an in this same chapter, also known as the brightest star in the universe.

The stars around represent fragments of this main star trickling down in the form of creation that illuminate as tiny specks of that same light.

As represented by Prophet, he was the ultimate grounder of higher reality in the form of creation having traveled the Heavens, as he contained that light in earthly physical body — The divine in human form made manifest.

At a more personal level, it is the divine within that we must connect to, to get in touch with our own inner light, that life force energy that keeps emanating eternally. The circle portal of two-bows length or nearer that opens to the gateway of that boundless eternal reality.

May God open our minds to receive even a drop from this immense blue ocean of unity consciousness & flow, as deep as we can go. As electromagnetic waves trickle down to all that can receive it.

The center of that energy is represented by Medina, at the site of the peak of the green dome. Green also represents the heart, the receiver of heavenly knowledge connected to the star reality. And the purple within the center of the Star symbolizes higher consciousness, expansion, the crown of higher knowing — violet flames emitting from its very being. It contains great magnificence that radiates light to all and births other stars into creation.

What an amazing site to bear witness to, if only we truly believe, in the power of One True God. As the Surah ends with a prostration to the most-high who created it all. How wondrously powerful of a reality, that no one can fathom how truly great it is.
And the heavens declare His glory.

And the stars testify to His might.

And how He creates the creatures.

And the earth, with all that is in it.

And the heavens, and all that is therein.

And the creation of the heavens and the earth.

And the power of the遴选 (Rahmat).
